Dr. Karim Lakhani

klakhani.com ♦ lakhani1118@gmail.com

Objective

Technical Program Manager with a unique background spanning environmental science research (PhD), software development, and program delivery. Experienced in leading technical implementations and advising scientific teams on digital transformation, with hands-on expertise in REST APIs, Python automation, and SQL reporting. Skilled at bridging the gap between domain experts, data systems, and software solutions, I aim to continue delivering impact at the intersection of science, technology, and program management.

Experience

Delivery Operations Manager, Albert Invent Jan. 2025 - Present

- Led implementation projects for enterprise clients, supporting **11+ scientific groups** in digitizing workflows on the Albert platform across R&D, QC, and engineering functions
- Conducted client trainings and workshops to drive adoption, advise on change management, and act as a trusted advisor during digital transformation initiatives
- Developed Python automation scripts and SQL reports to streamline ingestion and reporting of data

Technical Solutions Engineer, Epic Systems Sep. 2023 – Jan. 2025

- Supported many (**20+**) customers in their installation and maintenance of Epic healthcare software
- Developed technical training sessions for Epic reporting suite best practices aimed at technical staff and hospital executives **(60+ attendees)**
- Completed internal development projects on reporting for hospital billing

Graduate Research Assistant, Georgia Tech Aug. 2018 – Aug. 2023

- Generated new marine sediment data to investigate the ocean and atmosphere during the Last Ice Age
- Developed new analysis techniques to quantify uncertainty and improve estimates of ocean changes

Education

PhD in Earth and Atmospheric Science (EAS)
Georgia Institute of Technology (Georgia Tech) Aug. 2018 – Jul. 2023
Investigating Ocean-Atmosphere Interactions with Planktonic Foraminifera in the Tropical Pacific during the Last Glacial Maximum (LGM)

Bachelor of Science in Chemical Engineering
California Institute of Technology (Caltech) Sep. 2014 – Jun. 2018
