

Dr. Karim Lakhani

klakhani.com ♦ klakhani1118@gmail.com

Objective

Technical Program Manager with a unique background spanning environmental science research (PhD), software development, and program delivery. Experienced in leading technical implementations and advising scientific teams on digital transformation, with hands-on expertise in REST APIs, Python automation, and SQL reporting. Skilled at bridging the gap between domain experts, data systems, and software solutions, I aim to continue delivering impact at the intersection of science, technology, and program management.

Experience

FDS Delivery Manager, Albert Invent Apr. 2026 - Present

- Directly managed and mentored junior delivery managers, providing structured coaching, workload prioritization, and implementation feedback to accelerate their professional development
- Built 5+ internal web applications wrapping API workflows in intuitive interfaces, enabling repeatable execution of technical tasks by non-technical team members
- Created and led trainings on using python and SQL to improve scalability of implementation services

Delivery Operations Manager, Albert Invent Jan. 2025 – Apr. 2026

- Led 11+ **implementation projects** for 5+ enterprise clients, supporting scientific groups in digitizing workflows on the Albert platform across R&D, QC, and engineering functions
- Developed Python automation scripts and SQL reports to streamline ingestion and reporting of data
- Conducted client trainings and workshops to drive adoption, advise on change management, and act as a trusted advisor during digital transformation initiatives

Technical Solutions Engineer, Epic Systems Sep. 2023 – Jan. 2025

- Supported many (20+) customers in their installation and maintenance of Epic healthcare software
- Developed technical training sessions for Epic reporting suite best practices aimed at technical staff and hospital executives
- Completed internal development projects on reporting for hospital billing

Education

PhD in Earth and Atmospheric Science (EAS)

Georgia Institute of Technology (Georgia Tech)

Aug. 2018 – Jul. 2023

Investigating Ocean-Atmosphere Interactions with Planktonic Foraminifera in the Tropical Pacific during the Last Glacial Maximum

Bachelor of Science in Chemical Engineering

California Institute of Technology (Caltech)

Sep. 2014 – Jun. 2018
